

I realize this is a form letter that you may have seen 1000 times or more by now. But that should not belittle my opinion in this case. Quality radio programming barely exists outside of a few strong public radio stations and a small but strong number of independents. The rul changes proposed for June 2nd will make matters worse, and I can no longer sit idly by seeing our media conglomerated under a corporate banner whose agenda often precludes the dissemination of diverse opinions and musical formats.
